Days of Inventory by Brands

Inventory Value and Sum of Revenue Comparison

Recommendation

1. Brand C's 60 products need immediate replenishment.
2. Brand B is not much profitable. Since it generates less revenue than it's inventory value, we should focus on Brand B products to sellout and reduce the replenishment amount.

Supplier & Inventory Risk

Inventory Health by Lead-Time Demand

Recommendations

- Brand C should be purchased 21% more than current lead time demand.
- Brand A and B needs focus on sale or should decrease stocks purchase as they have highest days of inventory and remaining stocks.
